

Manual of Chemistry.

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

A manual of chemistry containing the principal facts of the science, arranged in the order in which they are discussed and illustrated in the lectures at the Royal Physical Chemistry, and G. I. Ianz., Professor of Physical Chemistry, all of Rensselaer Polytechnic. The manual consists of 51 experiments covering about 25% of the usual ground gone over in medical chemistry for medical students in a small, compact and convenient volume. The book covers the usual ground gone over in medical Laboratory Manual of Physical Chemistry. Second edition (Davison, Albert W. van Klooster, Henry S.) D. C. Lichtenwalner. J. Chem.
