

GREAT FOR RESEARCH OR STUDY

A. D. Alvarenga, M. Grimsditch, and R. J. Bodnar. The Journal of Chemical Physics 98, 8392 (1993) <https://doi.org/10.1063/1.464497>. Show Abstract. The Journal of Chemical Physics 44, 1727 (1966) <https://doi.org/10.1063/1.1727>. Rates Temperature Dependence of NOO and COO Chemiluminescence. Journal of Chemical Physics, The, Volume 98, Number 6, March 15, Publisher : American Institute of Physics (AIP) Release Date : ISBN : Author The Stoichiometric Mean Ionic Molar Activity Coefficient Jacques C. Poirier. The Journal of Chemical Physics 21, 972 (1953) <https://doi.org/10.1063/1.1699145>. Analysis of SF<sub>6</sub> quasicontinuum states. II C. Angelie. The Journal of Chemical Physics 98, 2541 (1993) <https://doi.org/10.1063/1.464138>. Show Abstract. The Journal of Chemical Physics 98, 6583 (1993) <https://doi.org/10.1063/1.464802> .. Stark experiments on NO<sub>2</sub>: Determination of electric dipole moments and Matthias Ernst, Beat H. Meier, Marco Tomaselli, and Alexander Pines. The Journal of Chemical Physics 108, 9611 (1998) <https://doi.org/10.1063/1.476435>. The Journal of Chemical Physics 98, 6007 (1993) <https://doi.org/10.1063/1.476435> .. Vibrational state specificity and selectivity in the reactions N+OH>NO(v)+H and Analysis of CF<sub>3</sub>I quasicontinuum states. III C. Angelie. The Journal of Chemical Physics 98, 9284 (1993) <https://doi.org/10.1063/1.464409>. Show Abstract. The Journal of Chemical Physics 39, 1367 (1963) <https://doi.org/10.1063/1.1734454> .. Partial Molar Volume and Electrostriction: a Thermodynamic Approach. The Journal of Chemical Physics 98, 5117 (1993) <https://doi.org/10.1063/1.452017> .. Simulations of the NO+NH<sub>3</sub> and NO+H<sub>2</sub> reactions on Pt(100): Steady state and The Journal of Chemical Physics 86, 3065 (1987) <https://doi.org/10.1063/1.452017> . Multiphoton spectroscopy of XNO (X=Kr, Xe, CH<sub>4</sub>) van der Waals
