

The Theory of Everything

One part Libba Brays *Going Bovine*, two parts *String Theory*, and three parts love story equals a whimsical novel that will change the way you think about the world. Sophie Sophia is obsessed with music from the late eighties. She also has an eccentric physicist father who sometimes vanishes for days and sees things other people don't see. But when he disappears for good and Sophie's mom moves them from Brooklyn, New York, to Havencrest, Illinois, for a fresh start, things take a turn for the weird. Sophie starts seeing things, like marching band pandas, just like her dad. Guided by Walt, her shaman panda, and her new (human) friend named Finny, Sophie is determined to find her father and figure out her visions, once and for all. So she travels back to where it began: New York City and NYU's Physics department. As she discovers more about her dad's research on M-theory and her father himself, Sophie opens her eyes to the world's infinite possibilities and her heart to love. Perfect for fans of *Going Bovine*, *The Perks of Being a Wallflower*, *Scott Pilgrim vs. The World* and *The Probability of Miracles*.

There's very little that's extraordinary about the rest of *The Theory of Everything*. It's a soft movie, glossy, filled with stirring, soapy music, and hitting highlights but *The Theory of Everything* Awards and Nominations. *The Theory of Everything* is the story of the most brilliant and celebrated physicist of our time, Stephen Hawking, and Jane Wilde the arts student he fell in love with.
